LONGSTANDING SECURITY & DURABILITY

We provide doors with best of the warranties in the industry. We believe strongly in our products. We have a PAN India network to serve our clients across country in case any problem arises.

SOLID MOULDED PANEL DOORS

Our solid moulded panel doors are made of a single solid wood core that is seasoned and air dried in a kiln to wick away the excess water thereby reducing its moisture content. This process strengthens the timber making it more durable, borer and termite resistant as well. Made with seasoned pine wood only the core material is chemically treated and seasoned to avoid warping and twisting. These doors are then finished in a choice of polish for a beautiful facade. Having been the preferred choice of Indian households for many years, we cater to a diverse set of clientele in real estate, healthcare, commerce and entertainment sectors.

We offer two types of solid moulded panel doors

- Veneer solid moulded panel doors (with or without polish*)
- Laminate moulded panel doors (Available only on request)

AVAILABLE THICKNESS

- Standard Thickness : 30 mm, 35 mm
- Thickness Available on request : 32 mm, 38 mm, 40 mm, 45 mm, 50 mm

FIXING & SETUP GUIDELINE

INSTALLATION GUIDELINES

- Doors can be cut on all the sides up to 12mm per side. Trimming should be done on both sides equally.
- Subsequent to trimming all sides should be primed or sealed with wood sealant and must be applied immediately.
- Bottom of the door must be painted / polished before installation of the door is done.
- Hinges must be aligned before fitting the door, to avoid bending. It is recommended that you fix two hinges in the upper portion on the door with a gap of 6 inches from each other and by leaving a gap of 12 inches from the top, for the first hinges. The rest of the hinges should be placed equal distance in the rest of the door length.
- We will not be held liable for any of the damages due to the wind or any external forces.
- If the doors are trimmed more than 12mm in width or height from any side the manufacturing warranty shall be void and Durian shall not be responsible for the same.
- Bathroom doors must be fitted with teak or hardwood lipping at the bottom to prevent moisture absorption. If not followed manufacturing warranty shall become void and Durian shall not be responsible for the same.
- 3mm space between the frame and door must be provided on all sides of the door shutter. This is to accommodate minor movements of the door frames.

STORAGE GUIDELINES

- Store flat on a level surface in a clean, dry, well ventilated building. Protect from dirt, water and abuse. Allow air circulation. Cover the top door with a moisture barrier.
- Doors should not be subjected to abnormal or sudden variations in heat, dryness or humidity, and should not be exposed to direct sunlight. Recommended humidity and temperature are 25% - 55% RH and 50°F - 90°F (10°C - 32°C).

WARNING

- Distortion Warping, bowing and waviness, can appear as a result of incorrect topcoat (paints or stains), improper finishing techniques and or finishing conditions. These are caused by but are not limited to incorrect topcoat, watered down paints, high humidity environments, excessive application of paints, and doors not being acclimated properly
- Please read and understand the entire procedure before attempting to finish your doors. Be sure to follow the coating manufacturer's warnings and instructions on all product labels. Durian does not warrant any coating unless applied by Durian. Any damage caused by or resulting from the application of a stain or paint will void the door warranty.
- Durian gives warranty only for its product. If it is found that there is a manufacturing defect, Durian shall repair only for its product and will not be responsible for any value addition what so ever.
- The decision of Durian Technical team in determining whether a defect is a manufacturing defect or an application defect will be treated as final.
