# ADVANTAGES

## Water Tightness

STARLINE windows incorporate an 8mm overlap between frame and sash, as well as dual compression gaskets, to prevent both dust penetration and water infiltration. They boast a proven water tightness of at least 2 litres/ min/m<sup>2</sup> @ 700 Pa

So your home stays absolutely dry however heavily it might be raining outside

## High Wind Load Performance

The wind load capacities of STARLINE Windows are built to withstand the gustiest wind conditions, which makes them an ideal choice in highrises and coastal areas

## Fire Resistance

STARLINE uPVC is classified as a high-impact resistant material. It is notably difficult to ignite and will self-extinguish when the source of heat is removed.

## Energy Saving

STARLINE uPVC Doors & Windows possess high heat insulation properties, which are up to three times better than Aluminium profiles.

## Durability

Unlike other materials, STARLINE uPVC profiles are resistant to atmospheric pollution, including a range of acids and alkalis. Our uPVC is low maintenance material and our Windows & Doors are designed to last for a lifetime.
