

PLYWOOD

ABOUT US

With over **50** years of experience in the Plywood industry, Durian is one of the undisputed leaders with a plethora of innovative products designed for clients across public and private industries. Our signature plywood products are used extensively in commercial and domestic settings. Durian plywood is affordable yet durable and offer unmatched strength and style.

We provide ideal solutions for personal and office spaces using indigenous technology, that gives our furniture and plywood products a distinctive edge in terms of craft and endurance. The following are the various types of plywood grades available:

- Moisture Resistant
- Boiling Water Resistant
- Boiling water proof
- Blockboard

While our ply is used across all our products, we also provide wholesale quantities to our dealers and distributors, globally.

CERTIFICATION

The IGBC rating systems are voluntary, consensus based, market-driven programmes. The rating systems are based on the five elements of the nature.

ISO 14001: 2015-ISO is an independent, non-governmental international organization with a membership of 162 national standards bodies.

FSC forest management certification confirms that the forest is being managed in a way that preserves biological diversity and benefits the lives of local people and workers, while ensuring it sustains economic viability.

For companies at the end of the supply chain, such as brand owners and retailers, PEFC certification offers many benefits: from highlighting sustainable procurement choices to meeting demanding legislative and market requirements.

The ISI mark is a standards-compliance mark for industrial products in India since 1955. The mark certifies that a product conforms to an Indian standard developed by the Bureau of Indian Standards, the national standards body of India.

Sedex is one of the world's leading ethical trade service providers, working to improve working conditions in global supply chains. We provide practical tools, services and a community network to help companies improve their responsible and sustainable business practices, and source responsibly.

GREENGUARD Certification Program. The GREENGUARD Certification Program gives assurance that products designed for use in indoor spaces meet strict chemical emissions limits, which contribute to the creation of healthier interiors.
